

DHL INTRASHIP

SIMPLIFY YOUR SHIPPING.

A powerful way of eShipping that grows with your business, whilst offering additional management features for increased efficiency.

TAKE SHIPPING TO THE NEXT LEVEL.

DHL INTRASHIP automates your standard routines for shipment processing, tracking and management. Even those who are not shipping professionals can speed through the process and be informed about shipments 24/7. And simple account management and reports give you visibility and control over the account.

The web-based shipping processing system, has been designed for large, decentralized organisations (e.g. banks, authorities, industry) which require larger shipping volumes.

Advanced and flexible to suit everyone's needs.

DHL INTRASHIP is easily customized during installation to meet your specific needs and processes. Importing data from your systems, managing shippers in different locations and controlling online approval processes can be handled with ease. Customer support for more complex configuration requirements is provided by DHL Express at no cost, to ensure that your business gets the most from this powerful eShipping tool.

You get:

- **One easy-to-use shipping solution, configurable to your business needs and available in 12 languages**
- **Integrated workflow management to support online monitoring and approval processes**
- **Unlimited address book (with data import and export)**
- **Central configuration and management of user profiles across multiple sites**
- **Advanced shipment tracking and management reports provide visibility across departments and sites**
- **Automatic eMail notifications for shipment events to trigger actions internally or to advise the status**

Excellent for:

- **Supporting multi-lingual businesses or environments**
- **Getting visibility and control over shipments generated by several departments or multiple sites**
- **Tailoring your automated shipment processes**
- **Regular mailings or seasonal/event peaks**

DHL INTRASHIP

HOW DOES IT WORK IN PRACTICE?

DHL INTRASHIP helps your business in many ways:

1. Simpler, More Accurate Shipment Preparation;
 - Let's you import address and shipment details from your business systems, reducing data-entry errors
 - One shipping tool and process reduces complexity and training for new hires
2. Better account management and control;
 - Your preferred express services can be configured and special rates made available for all users
 - Daily shipment manifest transmitted to DHL electronically at pre-scheduled times that suit your production line or mailroom
3. Improved visibility and control across your business;
 - Emails automatically generated and delivered
 - Advanced tracking and reporting features with exception reports so you can take the right action and keeping your shipments moving

eShipping in my business

Keeping everyone on the same page.

Marcus is a consultant for a mid-sized industrial firm with offices in three major cities. When in the field, he finds that clients like to see an actual product sample as soon as possible. Marcus simply logs onto DHL INTRASHIP, which has been customized to select DHL EUROPLUS, a special rate for this kind of shipment.

The actual packing and shipment processing is handled in the relevant warehouse. But thanks to DHL INTRASHIP, Marcus is never out of the loop. He receives an email when the shipment is dispatched, so he can then call to close the sale.

Preparing bulk mailings to some or all his customers and prospects via DHL INTRASHIP is easy – whether it's the new product catalogue or a personal season's greeting. So Marcus let's the mailroom and DHL handle the shipping, so he can focus on his customers and bringing in new business.

BENEFITS FOR YOUR BUSINESS.

Change the way you ship for the better.
