My eShipping. My day.

Better than before.

In Maria's busy day, shipping cannot take a lot of time. So once she started using DHL SHIP NOW, it soon became her favourite way to ship.

The first time she used it, she was really impressed that the website was easy to use and quick. But what she really likes best is the confirmation email with the trackable link. By sending this to the receiver, she is seen to be providing good service.

She has also started using DHL SHIP NOW as a private web trader. In the evening, she responds to buyers' orders, quotes shipping prices directly and can book, prepare and pay for the shipping at her own convenience.
